 RAVELLI

**FIREPLACES,
AN UNDENIABLE CHARM.**

JULY 2020

THE HEAT, YOUR RELAX

When you arrive home you need to empty your mind and reconcile with yourself and the space around you, to find a peaceful and relaxing environment where you can regenerate yourself. For this reason, we have identified what is important for you and your well-being working to make the heating system a discreet presence capable of giving you that silence you are looking for together with a uniform and welcoming warmth.

Ravelli is constantly looking for differentiating solutions, capable of improving the quality of life in a real and concrete way. From the use of natural convection to maximize heat diffusion in a silent way, to the self-cleaning firepot to minimize maintenance and cleaning, up to the introduction of the 24V gearmotor and the fans that can be deactivated to make you enjoy the warmth of the home in total relax.

Silence is an achievement we are proud of.

FIREPLACES, AN UNDENIABLE CHARM.

RBV and RBC range: 4 reasons to choose Ravelli's fireplaces

Both in the kitchen and in the living area, where you can welcome guests or spend a few hours of relax: the fireplace is atmosphere, charm, energy. Ravelli fireplaces are made to let you safely and comfortably spend precious time in your home. Thanks to the balance of each component, we have created functional inserts that can be easily installed in all traditional fireplaces to recreate that magic that you cannot give up.

Ravelli offers a wide range of **ventilated and ducted inserts** that are particularly performing in terms of emissions.

1 ENVIRONMENTAL FRIENDLY

Ecodesign 2022 compliance

2 EFFICIENT

Uniform, pleasant and silent heating

3 SIMPLE

Simple cleaning and maintenance, without clogging

4 CUSTOMIZABLE

Wide range of models and sizes for every need

Ravelli's RBV and RBC fireplaces meet the environmentally friendly design criteria and comply with the energy efficiency and emissions requirements established by the **European Ecodesign Regulation 2022** for domestic biomass appliances. They are ecological products because thanks to their technology they **reduce emissions**.

The whole range is characterized by a glass front that allows a wide view of the flame; they have the die-cast aluminum loading system, a cast iron firepot and hot air exchanger. The AIR range has a front fan while in the two FLOW inserts the fan can be used to manage the distribution of hot air between ducting and front ventilation, simply through a manual selector.

		P. Tot kW	P. Nom kW	Dimension (LxhxP) cm
AIR	RBV 7010 COMPACT	3,2 - 10,2	3 - 9	70x56x54
	RBV 8008	3,2 - 8,5	3 - 7,7	80x62x54
	RBV 8010	3,2 - 10,2	3 - 9	80x62x54
FLOW	RBC 8010	3,2 - 10,2	3 - 9	80x66x54
	RBC 8012	3,2 - 11,6	3 - 10,2	80x66x54

Many solutions for different housing needs. The range of Ravelli pellet fireplaces is available in different sizes and output.

It is also possible to choose between different pellet loading modes (drawer or trap door) allowing you to find the ideal fireplace for your home. The **Ravelli inserts** have been designed to make **cleaning and maintenance** interventions **simple and fast** which, thanks to the presence of large smoke passages, are rarely necessary.

Different styles to suit your needs! The fireplaces of the RBV and RBC range can be installed with a double color aesthetic frame (three variants available) or simply by using the small compensation frame included.
